Optimizing Performance at UCONN

Leo Przybylski

Abstract

rSmart recently conducted load tests at UConn in order to prove stability of KFS as a campus-wide financial system. We would like to review the scenarios, our findings, and the various improvements that we were led to with the Kuali Community.

1 Objectives

- Overview of rSmart performance testing tools.
- Analyze strategies to performance testing.
- Explanation of caveats we encountered.
- Analyze reports from scenario executions.
- Review the improvements made and the results from further testing.
